

KARACHI TUBEWELL & PUMPS

KARACHI TUBEWELL & PUMPS

INTRODUCTION:

Karachi Tube well & Pumps (KTP) is promoted by Geo-Studies and established with the aim to provide best quality ground water Services to its clients. The company wants to achieve the high level targets with expertise and technical competence. KTP provide complete range of services Like conducting of Electrical Resistivity Survey (E.R.S), Topographical Survey, Soil Investigation, Tube well Drilling , Ground Water Geophysical, Geo technical Studies Geophysical Well Logging, Environmental Assessment.

VISION:

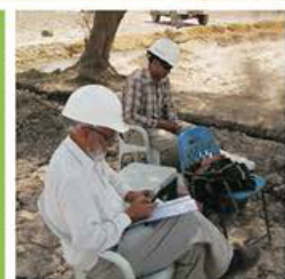

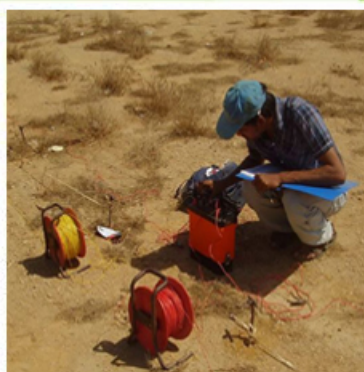

We conduct business in highly professional manner with a background for opting best practices .Our future target is to conduct business activities across the border of Pakistan .specially up to Middle Eastern Countries & Asian states.

MISSION

- To provide better quality services in accordance with clients Satisfaction
- To use new technologies state art of System in drilling process.
- To provide concise & precise result to the client through computerized Data system.
- To help and guide the client to Understand the ground water issues, operations & maintaining the highest recovery level in drilling sector.

SCOPE OF SERVICES

- *Sampling*
- *Geological Mapping*
- *Geophysical logging*
- *Geophysical Surveys*
- *Litho logy*
- *Non-Core Drilling*
- *Drill Hole Mapping*
- *Environmental Assessment*

WATER RESOURCES

- Selection of suitable drilling site for test hole and Tube wells.
- Implementing the latest Techniques in finding and developing available aquifers.
- Designing construction and development of Tube wells detection of water bearing structure zones.
- Performing of Geophysical well logging to Determine various formations.

TUBE WELL CONSTRUCTION

- To help and guide the client to Understand the drilling Issues.
- To provide better quality of services in accordance with clients satisfaction.
- To focus on quality of Drilling Operations & Maintaining the highest Level of recovery in Drilling sector.

OUR CORE COMPETENCIES

- Economical rates of services
- Surveys & Tube Well Drilling
- Fast and Quick assessment.
- Invaluable expertise
- Cost Effective
- Time allocated for work
- Modern machineries.
- New equipments for testing.

GEOPHYSICAL INVESTIGATION

- Electrical Resistivity Survey (E.R.S).
- Detection of ground water contamination.
- Selection of suitable and effective site for Tube well drilling.
- Water Chemical Analysis.
- Geo-Vertical Survey.

OUR FUTURE PROGRAM

- To provide better quality of services in accordance with clients satisfaction.
- Help and guide the client to Understand The drilling Issues.
